Subject: Acid mine drainage spill

Hi Harry,

If you would please include me in any updates on the acid mine drainage spill, I'd appreciate it. We are monitoring the San Juan River this summer and have completed two of four rounds to date. We were not planning to collect samples again until August 17, but I have the bottles necessary to do so if anyone needs us to. We've been monitoring at five locations: Hogback, 10 miles below Shiprock, Four Corners, Montezuma Creek, and Bluff. Given the nature of this release, the Water Quality Program is very interested in any information you are able to provide and are willing to assist in any way needed. I can be reached either at my office using the number below or on my cell (505-860-5166). Thanks.
